

Download the .license file from the email to a USB. Put the USB into the GFX display.

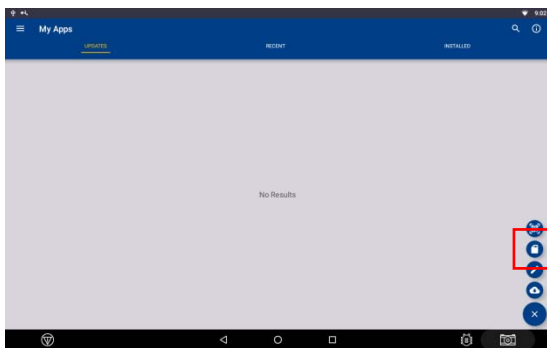

Step 1: Click on “App Central”

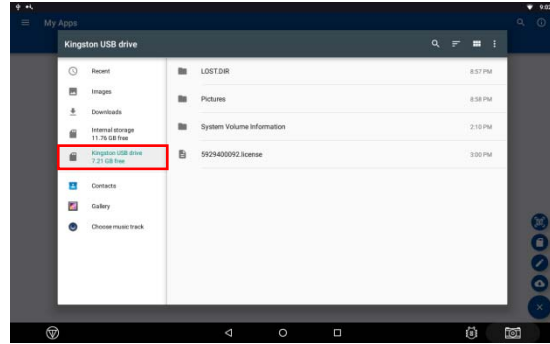

Step 2: Click on “+” in the bottom right

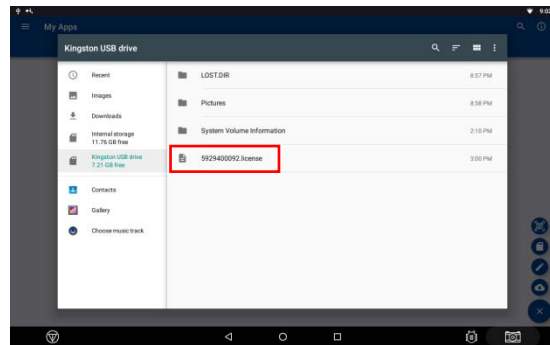

Step 3: Click on the SD Card Image

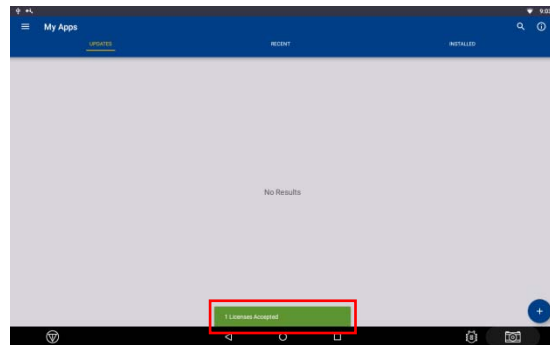

Step 4: Click on the USB, it will be named differently than what is shown in the photo

Step 5: Click on the .license file. This file will be titled as the receiver serial number.

Step 6: A green icon that says “License accepted” on the lower center of the display.

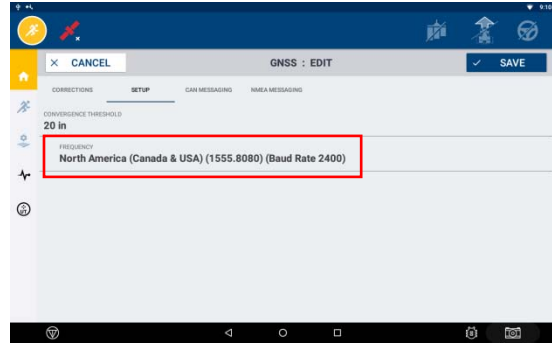

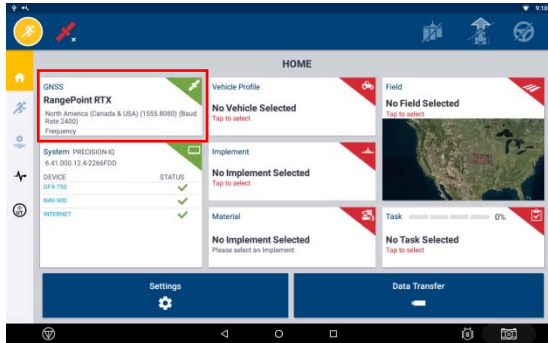

Phone · 1-866-782-6873

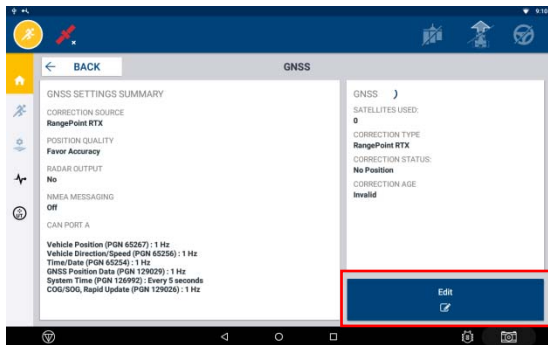

Website · [www.pentagonfarm.com](http://www.pentagonfarm.com)

Step 7: Navigate to Precision IQ App, click on GNSS.

Step 10: Click on "Setup". Ensure it is set to "North America (Canada & USA) (1555.8080) (Baud Rate 2400)". If anything else is selected you must change it.

Step 8: Click on "Edit"

Step 9: Ensure it is set to RangePoint RTX, if it isn't click on whatever is shown and change it to RangePoint RTX.
